This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

NOTE.

THIS Catalogue relates to a Collection of Books, bearing more or less directly on the subjects of Health and Education, contributed for exhibition and reference by various departments of Her Majesty's and Foreign Governments, authors, publishers, societies, and others—English and Foreign.

The Executive Council have thought it well that visitors to the Exhibition should have an opportunity of consulting these works, rather than merely seeing them displayed in cases; and two rooms in the Royal Albert Hall have accordingly been assigned as Library and Reading Room.

A collection of books composed entirely of voluntary contributions cannot claim to be in any measure complete, but it is hoped that much will be found that is interesting and instructive, and that the Library may thus aid in furthering the objects of the Exhibition.

The Catalogue must be regarded as "Under Revision," as books are still coming in.

CONCUR IN RECOMMENDING THE

OXFORD BIBLE for TEACHERS.

EXTRACTS FROM OPINIONS.

Dean of Canterbury.—"'The OXFORD BIBLE FOR TEACHERS' is a most acceptable present to any who are engaged in teaching."

Bishop of Bedford.—"A most valuable book, and a very great boon to all Bible students."

Rev. Prebendary Wilson.—"'The OXFORD BIBLE FOR TEACHERS' is, in every respect, as regards type, paper, binding, and general information, the most perfect volume I have ever examined."

Bishop of Lichfield.—"Having by frequent use made myself acquainted with this edition of the Holy Scriptures, I have no hesitation in saying that it is a most valuable book, and that the explanatory matter collected in the various appendices cannot but prove most helpful, both to teachers and learners, in acquiring a more accurate and extensive knowledge of the Word of God."

Dean of Rochester.—"The amount of information compressed into the Appendix is wonderful. And the Dean is glad to hear that the help of such eminent contributors has been available for its compilation."

Bishop of Derry.—"I know of nothing that can be compared to it for fulness of information or accuracy of treatment."

Rev. C. H. Spurgeon.—"'The OXFORD BIBLES FOR TEACHERS' are as good as ever we can expect to see; the helpful matter bound up with them constitutes a library of Scriptural information. From the smallest to the largest copy there are several gradations, and any of these bound in limp morocco would be as valuable a present as one might wish to receive or give."
